22	I. INTRODUCTION		
23			
24	1. This action is a citizen suit brought under section 505 of the Clean Water Act		
25	("CWA"), 33 U.S.C. § 1365, as amended. Plaintiff Columbia Riverkeeper ("Riverkeeper") seeks		
26	declaratory and injunctive relief, the imposition of civil penalties, and the award of costs,		
27	including attorneys' and expert witness fees for Defendant Thompson Metal Fab, Inc.'s		
20			

("Thompson Metal") repeated and ongoing violations of the terms and conditions of its National Pollutant Discharge Elimination System ("NPDES") permit authorizing discharges of pollutants from Thompson Metal's facility to waters of the United States.

II. JURISDICTION AND VENUE

- 2. This Court has subject matter jurisdiction under section 505(a) of the CWA, 33 U.S.C. § 1365(a) (CWA citizen suit provision), and 28 U.S.C. § 1331 (federal question). Thompson Metal is in violation of an "effluent standard or limitation" as defined by section 505(f) of the CWA, 33 U.S.C. § 1365(f). The relief requested herein is authorized by sections 309(d) and 505 of the CWA, 33 U.S.C. §§ 1319(d) and 1365 and 28 U.S.C. §§ 2201 and 2202.
- 3. In accordance with section 505(b)(1)(A) of the CWA, 33 U.S.C. § 1365(b)(1)(A), Riverkeeper notified Thompson Metal and its registered agent of Thompson Metal's violations of its NPDES permits and of Riverkeeper's intent to sue under the CWA, by letter dated and postmarked October 27, 2020 ("Notice Letter"). A copy of the Notice Letter is attached to this complaint as Exhibit 1. The allegations in sections II–IX of the Notice Letter, attached hereto as Exhibit 1 at 2–15, are hereby incorporated by reference. Riverkeeper also notified the Administrator of the United States Environmental Protection Agency ("EPA"), the Administrator of EPA Region 10, and the Director of Washington Department of Ecology ("Ecology") by mailing copies to the Notice Letter to those officials on October 27, 2020.
- 4. At the time of the filing of this complaint, more than sixty days have passed since the Notice Letter and copies thereof were issued in the manner described in the preceding paragraph.
- 5. The violations complained of in the Notice Letter are continuing and/or reasonably likely to recur. Thompson Metal is in violation of its NPDES permit.

- 6. At the time of the filing of this complaint, neither the EPA nor Ecology has commenced any action constituting diligent prosecution to redress the violations alleged in the Notice Letter.
- 7. The source of the violations complained of is located in Clark County,
 Washington, within the Western District of Washington, and venue is therefore appropriate in
 the Western District of Washington under section 505(c)(1) of the CWA, 33 U.S.C. § 1365(c)(1).

III. PARTIES

- 8. Plaintiff Columbia Riverkeeper is suing on behalf of itself and its members. Riverkeeper is a 501(c)(3) non-profit corporation registered in the State of Washington. The mission of Riverkeeper is to restore and protect the water quality of the Columbia River and all life connected to it, from the headwaters to the Pacific Ocean. To achieve these objectives, Riverkeeper implements scientific, educational, and legal programs aimed at protecting water quality and habitat in the Columbia River Basin. This lawsuit is part of Riverkeeper's effort to improve water quality in the Columbia River Basin for purposes including recreation, habitat quality, and subsistence, recreational, and commercial fishing.
- 9. Riverkeeper has representational standing to bring this action. Riverkeeper has over 16,000 members, many of whom reside in the vicinity of waters affected by Thompson Metal's discharges of pollutants. Members of Riverkeeper use and enjoy the waters and the surrounding areas that are adversely affected by Thompson Metal's discharges. Riverkeeper's members use these areas for, *inter alia*, fishing, swimming, hiking, walking, photography, boating, and observing wildlife. Thompson Metal has consistently violated the conditions of its NPDES permits and exceeded the permits' benchmark pollutant discharge levels. Riverkeeper has serious concerns about the impacts of Thompson Metal's operations and industrial stormwater discharges on the Columbia River. Thompson Metal's operations and stormwater

discharges degrade water quality in the Columbia River Basin. The environmental, health, aesthetic, and recreational interests of Riverkeeper's members have been, are being, and will be adversely affected by Thompson Metal's NPDES permit violations addressed herein and by the members' reasonable concerns related to the effects of the violations and pollutant discharges. These injuries are fairly traceable to the violations and redressable by this Court.

- 10. Riverkeeper also has organizational standing to bring this action. Riverkeeper actively engages in a variety of educational and advocacy efforts to improve water quality in the Columbia River and its tributaries. Thompson Metal has failed to fulfill its monitoring, recordkeeping, reporting, public disclosure, and planning requirements, among others, necessary for compliance with its NPDES permits. As a result, Riverkeeper is deprived of information that supports its ability to serve its members by disseminating information and taking appropriate action. Riverkeeper's efforts to educate and advocate for greater environmental protection for the benefit of its members is thereby obstructed. Thus, Riverkeeper's organizational interests have been adversely affected by Thompson Metal's violations. These injuries are fairly traceable to Thompson Metal's violations and redressable by this Court.
- 11. Defendant Thompson Metal is a corporation organized and existing under the laws of the State of Oregon and is authorized to conduct business in Washington.
- 12. Thompson Metal owns and operates its industrial facility at or near 3000 SE Hidden Way, Vancouver, Washington 98661 (hereinafter "the Facility"). Thompson Metal's Facility is on land and adjacent to the Columbia River. Thompson Metal's Facility discharges stormwater associated with industrial activity, and pollutants contained therein, to the Columbia River.

IV. LEGAL BACKGROUND

- 13. Section 301(a) of the CWA, 33 U.S.C. § 1311(a), prohibits the discharge of pollutants by any person unless authorized under certain provisions of the CWA, including an NPDES permit issued pursuant to section 402 of the CWA, 33 U.S.C. § 1342.
- 14. The State of Washington has established a federally approved state NPDES program administered by Ecology. Wash. Rev. Code § 90.48.260; Wash. Admin. Code ch. 173-220. This program was approved by the Administrator of the EPA pursuant to section 402(b) of the CWA, 33 U.S.C. § 1342(b).
- 15. Ecology has issued several iterations of the Industrial Stormwater General Permit ("General Permit") under section 402(a) of the CWA, 33 U.S.C. § 1342(a), the most recent of which was issued on November 20, 2019, became effective on January 1, 2020, and is set to expire on December 31, 2024 (the "2020 General Permit"). The previous iteration was issued on December 3, 2014, became effective on January 2, 2015, and expired on December 31, 2019 (the "2015 General Permit"). The General Permit, in its various iterations since its first issuance in 1993, all of which contain comparable requirements, authorizes those that obtain coverage thereunder to discharge stormwater associated with industrial activity, a pollutant under the CWA, and other pollutants contained in the stormwater to waters of the United States subject to certain terms and conditions.
- 16. The 2015 General Permit and the 2020 General Permit (collectively, "General Permits") impose terms and conditions, including discharge monitoring and sampling requirements, reporting and recordkeeping requirements, public disclosure requirements, and restrictions on the quality of stormwater discharges. To reduce and eliminate pollutants in stormwater discharges, the General Permits require, among other things, that permittees develop and implement a Stormwater Pollution Prevention Plan ("SWPPP") that includes appropriate

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
